

MODULO

MODULO housings are modular and versatile systems for housing HEPA filters and CAF - SAF mod. activated carbon filters. Installation is directly in the duct with airflow horizontal.

Supplied with access door and locking eccentric cams. The filter is locked by an eccentric lever.

Perforated flanges are on the air inlet and outlet sides.

MATERIAL AND FINISH

- Galvanized steel sheet.
- Closed cell expanded neoprene gasket on door stop.
- M8 threaded inserts.

APPLICATION

Thanks to their ease of installation and modularity, they are the perfect solution to

upgrade the overall filtration efficiency in any existing ventilation system.

They are in-line mounted directly into the ductwork.

Side access for maintenance and filter replacement; upon request the housings can be supplied with pressure ports upstream and downstream the filter, for local or remote pressure drop measurement.

VERSIONS

- S: AISI 304 stainless steel.
- ATEX II 2 GD T6.

ACCESSORIES

- D: Pressure probes.

DIMENSIONS MODULO

Code	Dimensions [mm]			Pitch holes [mm]	Holes no	Weight [Kg]	ML €
	L	H	W				
ML 52	690	385	450	170/211	12	25	
ML 5	690	690	450	170	16	33	
2 ML 5	690	1 380	450	170	32	66	
3 ML 5	690	2 070	450	170	48	100
